

Space Ventures Investors Series B Capital Raising

Frankfurt am Main, Germany. November 22nd, 2021

Overview

The Series B Capital Raising will focus on Space Commodities and Resources.

“Class A” Shares will be issued.

The period is from November 22nd 2021 – February 28th 2022.

The goal is to raise £1 million during different stages of the Series B Capital Raising.

Background

SVI is focussed on building a Strategic Space Value Chain.

SVI has developed significant Earth Observation (EO) expertise and built a portfolio of Space Start-ups, many of them fusing EO with AI and ML.

SVI'S EO experience led the Management to develop the Lunar Resources Registry, which uses similar Earth Observation software, for the purpose of registering Lunar locations.

Purpose of Capital Raising

SVI will focus in 2022 to make Space Commodities and Lunar mining possible.

It is already part of [Lunar Resources Registry](#), and is a co-founder (since 2019) of the [Space Commodities Exchange](#).

Recently SVI formed a joint venture to create a European Lunar Lander. The business plan is to use existing technology to manufacture affordable landers to explore and land in the many high-value locations.

SVI is conducting a capital raising to scale joint ventures up, and maintain its first-mover advantage.
